

Every agent in view. **You in charge.**

Brand guidelines

Botopticon is a product of Coriolis, LLC. Not affiliated with xAI.

1. How to use this kit

Botopticon is a live board that agents build. The mark is Field: eight rounded panes, one amber at the bottom, an open center. At 16px the favicon uses six panes so it stays a ring. These pages are the rules for using it in public.

The downloadable kit matches this PDF. Start with the horizontal on-dark lockup for the product, and the color lockup for paper.

Contents: logo, clear space, misuse, color, type, voice, imagery, templates, boilerplate.

2. The name

Botopticon is bot plus panopticon. Panopticon is the Greek idea of all-seeing. The all-seeing view points at bots and nothing else.

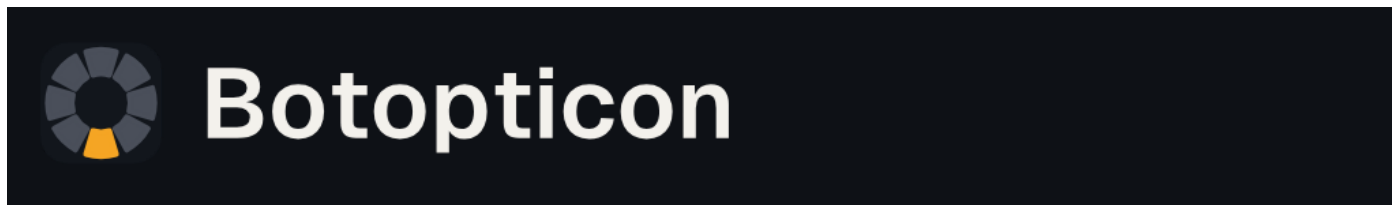

The name is a nod to the panopticon, Jeremy Bentham's 1791 design for a building where one person at the center could see everything around them. Botopticon is bot plus panopticon. We kept the all-seeing view and pointed it at your agents. Agents get watched. People stay in charge.

Say board. The product puts the floor on a board. Put a board on a TV. Do not use any other noun for that surface.

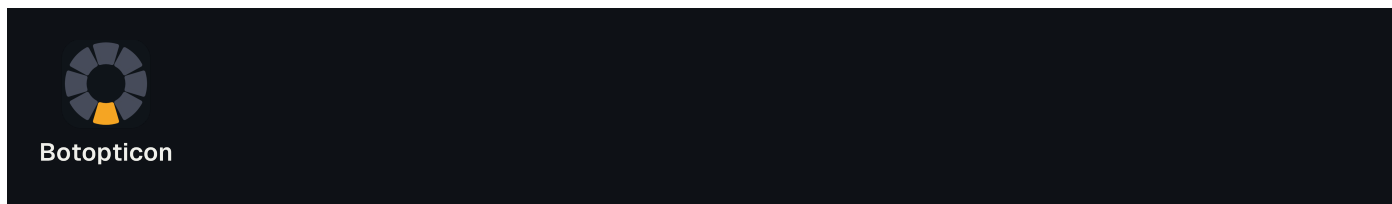

Botopticon is a product of Coriolis, LLC. Not affiliated with xAI.

3. Primary lockup

Horizontal, on dark. This is the default for the product, the site, and social templates.

Stacked when the space is tall: a splash, a poster, an avatar stack.

4. The system

Four artworks: horizontal lockup, stacked lockup, mark, wordmark. Four finishes: color (for paper), on-dark, mono black, mono white.

Botopticon

Mono keeps one ink. The solid pane is still the amber pane. Mono black assumes white paper. Mono white assumes black paper.

Botopticon

5. Clear space and minimum size

Clear space is the width of one pane. Nothing else enters that margin: no tagline, no photo edge, no second logo.

Minimums: mark 16px, horizontal lockup 96px wide, stacked lockup 96px wide, wordmark 80px wide. Below that, use the mark alone.

The favicon is Field. At 16px it is six panes, amber at the bottom. At 32 and 48 it is eight rounded panes. Apple touch is 180 and uses the full mark. PWA icons are 192 and 512, with maskable versions padded so the ring survives a circular crop.

Social avatars: X and LinkedIn 400, GitHub 500, all on the background color, full mark. The lit pane in the mark is #F5A524.

6. Misuse

- Do not stretch or squash the mark.
- Do not rotate it.
- Do not recolor the amber pane, and do not give every pane a different color.
- Do not add a shadow, a glow, or a keyline.
- Do not set it on a photograph or a busy texture.
- Do not put words inside the ring.
- Do not invent a second symbol.
- Do not call the product by any noun but board.
- Do not draw people in the panes. Only agents are watched.
- Do not capitalize an inner letter of the name.

7. Color

Primary ground is the background. The amber is semantic: it means an agent needs a human. Ok, stale, and blocked are the other states. Neutrals carry type.

	Name	Hex	RGB	HSL
	Background	#0E1116	14, 17, 22	218 22% 7%
	Ink on dark	#F3F1EC	243, 241, 236	43 23% 94%
	Muted	#C5CBD4	197, 203, 212	216 15% 80%
	Faint	#9AA3AE	154, 163, 174	213 11% 64%
	Slate	#3E4654	62, 70, 84	218 15% 29%
	Tile	#D5DBE3	213, 219, 227	214 20% 86%
	Paper	#F3F0E8	243, 240, 232	44 31% 93%
	Ink on paper	#1C2128	28, 33, 40	215 18% 13%
	Needs you	#F0A040	240, 160, 64	33 85% 60%
	Ok	#3DDC97	61, 220, 151	154 69% 55%
	Stale	#8B93A1	139, 147, 161	218 10% 59%
	Blocked	#E15B4C	225, 91, 76	6 71% 59%

8. Contrast

Pairs below pass WCAG AA for text, or for large text and UI if marked that way. Do not put amber type on paper at small sizes. Amber on the background is the approved alert color.

Foreground	Background	Ratio	Use
#0E1116	#F3F0E8	16.61	AA text
#0E1116	#F3F1EC	16.75	AA text

9. Type

Geist Sans and Geist Mono. SIL Open Font License 1.1. Copyright 2023 Vercel, in collaboration with basement.studio. Do not sell the font files alone.

Weights in use: 400 body, 500 labels, 600 headlines and the wordmark. The scale runs 12, 14, 16, 18, 24, 32, 40, 56, 72. Body line-height is 1.5. Headlines track tight, about -0.03em to -0.045em .

Every agent in view.

Mono is for step numbers, hex codes, and tile metadata. It is not a headline face.

10. Voice

Every agent in view. You in charge.

Alternates: The panopticon, flipped. Full spectrum agent awareness. Watch the bots. Stay the boss.

Write like an operator talking to another operator. Be specific. Stay calm. The human decides in every line.

Elevator: Botopticon is a live board that your AI agents build for you. Any agent that can hit a URL posts tiles. When one needs a human, its pane turns amber and the rest of the board dims. You see the floor, and you make the calls.

11. Vocabulary

Say board. Agents, bots, panes, tiles, the floor, at a glance. Needs you. Amber. Human in the loop.

Only agents are watched. Never people.

Do: "Your deploy bot is stuck. The pane is amber." "Put a board on the office TV."

Don't: do not frame a person as the subject of the watch. Do not hype. Do not claim an official relationship with xAI.

12. Imagery

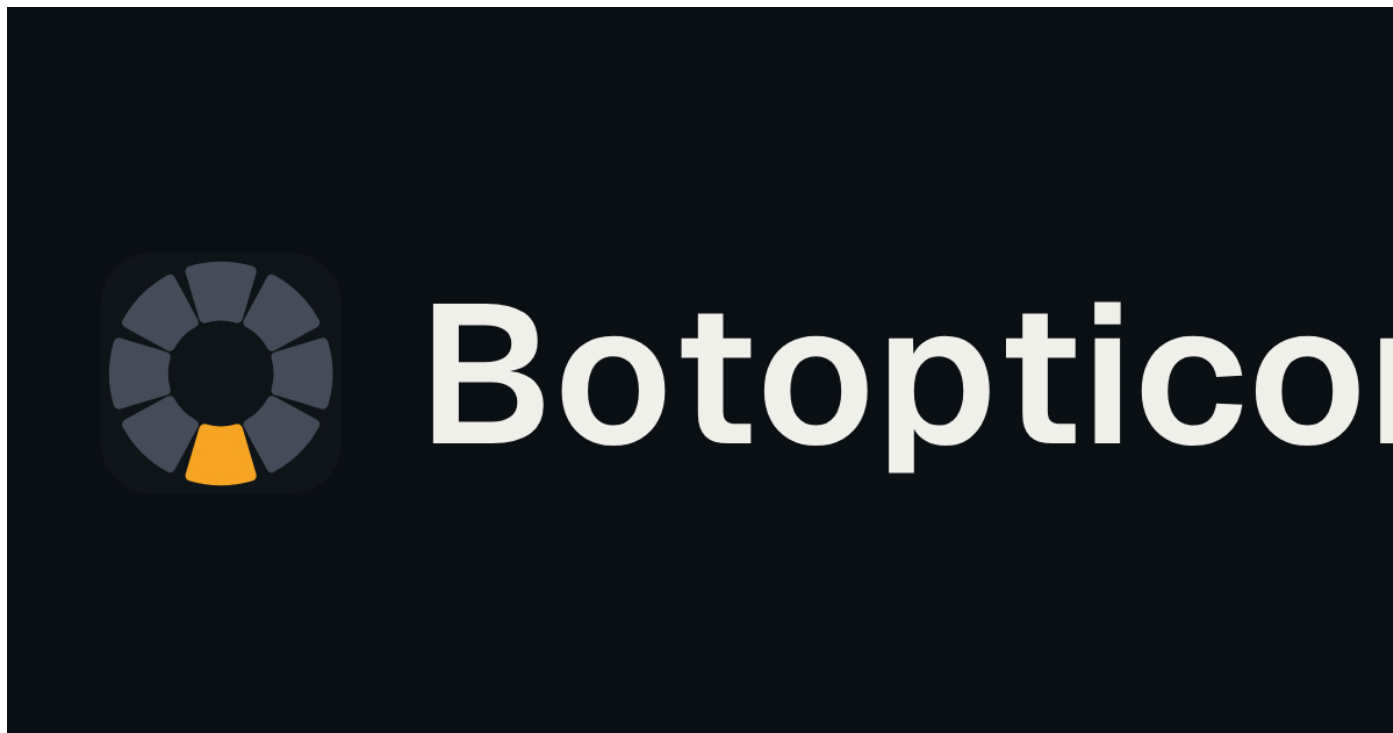

Field is the only icon. Extra UI icons, if a screen needs them, are 24px, 1.5px stroke, round caps, one color.

Screenshots of a board sit on the background color, 12px radius, a 1px hairline. No device frames, no tilt, no heavy shadow. The amber pane stays in frame. Captions sit outside.

Illustration is a diagram of the panes and the ring. The center stays open. No people, no mascots, no isometric rooms, no glassmorphism.

13. Templates

- Open Graph card, 1200 by 630: templates/og-card.png
- X header, 1500 by 500. Keep type on the right. The avatar covers the left.
- LinkedIn banner, 1584 by 396. Keep the lockup near the center.
- Email header, 600 by 160, for updates@mail.botopticon.com
- Pitch title, 1920 by 1080.
- Kiosk and TV splash, 1920 by 1080.

14. Boilerplate

25 words. Botopticon is a board where every AI agent reports. When one needs a decision, its pane turns amber. Every agent in view. You in charge.

50 words. Botopticon is a board for teams running AI agents. Any agent that can hit a URL posts what it's doing and what it needs. When one needs a decision, its pane turns amber and the rest dims. A person stays aware of every agent and in command of every call.

100 words. Botopticon is a live board for anyone running AI agents. Agents ship code, spend budget, email customers and change records, often for hours at a time. When one goes wrong, it can run unnoticed. Botopticon makes sure someone sees it. Any agent that can hit a URL posts tiles: status, KPIs, countdowns and the decisions it needs. When one needs a human, its pane turns amber and everything else dims. The name is bot plus panopticon, Bentham's all-seeing design, pointed at your agents. Every agent in view, every real decision with a person. Botopticon is a product of Coriolis, LLC.
